

# Arizona Board of Technical Registration

VOLUME 3, ISSUE 4

MAY 2016

## Chairman's Communique

This time of year, with the end of legislative sessions and graduations, is a time for many people to reflect upon achievements, hardships and plans for the future.

I had the opportunity and the privilege to attend the Arizona State University Spring 2016 Commencement and Convocation. I attended in support of a landscape architect graduate who interned with me at ADOT who was being awarded "The Alumni Association Outstanding Graduate Award." During the ceremony, ASU President, Michael Crow, admonished graduates and reminded the audience of the importance of not only education, but also the application of that

education in performance of all the various endeavors that graduates choose to pursue.

Then it dawned on me that in 1966 I was listening to the President of Utah State University at my own graduation in Landscape Architecture & Environmental Planning make very similar remarks. It was a rude awakening to me that 50 years in professional practice had flown by!

Reflecting on the end of the Legislative Session, I will, unfortunately keep a less happy memory because this past Session, the Legislature endeavored to deregulate the practices of landscape architecture and geology in Arizona. The Board of Technical Registration has, for so many years, regulated the professional practice of Architects, Engineers, Geologists, Home Inspectors, Land Surveyors, Landscape Architects, and the Alarm industry, in order to protect the public by ensuring that these professionals provide competent service. The Board has consistently taken action to ensure that qualified professional registrants, as

they provide services, maintain adequate knowledge, provide work that demonstrates that knowledge and ethical commitment, and when it falls short, taken appropriate disciplinary action.

Although landscape architects are still required to practice with registration by the Board, the geologists may now choose to voluntarily become registered or practice without registration. That "choice" may endanger public health, safety and welfare.

If I could sum up my memories of 2016 to this point, and provide any "wisdom" to interested stakeholders going into the future, I would urge them to pay attention to and anticipate future attempts to deregulate other learned professions. I also have some words and phrases that come to mind for those lawmakers: "open dialog," "constant observation," "due diligence," "active participation," "if it's working why change it?" "walk in the shoes of another to know and understand," and, "take the hand we have been dealt and make the best of it." Hopefully, someone will listen.

## Democracy in Action

The 2016 Legislative session was, by far, the most challenging session for the Board in recent history. As a result of the Board's self-audit in its sunset year, and, having taken very seriously the Governor's directives to operate more effectively, and to become more "relevant" to its licensed populations and the public, the Board ran four bills of its own this session.

Senator Yee, Chairman of the Board's Committee of Reference, sponsored SB1119, the agency's continuation bill, and SB1422, the Board's first "omnibus" bill in decades. The Continuation bill proposed continuing the agency for eight (8) more years. The Omnibus bill was the Board's first attempt to revise its practice act. Additional revisions are planned for another bill to be offered next session.

This year's Omnibus bill proposed removing the archaic terms "architect in-training" and "landscape architect in-training" from the Board's practice act. It proposed clearer language for the law requiring registration to call oneself an architect, engineer, and landscape architect, and it clarified existing language requiring that one of the engineer members of the Board be a civil engineer. The bill clarified language relating to home inspectors, and it proposed to raise the requirement to obtain registration as a surveyor from 6 to 8 years. However, Rep. Petersen sponsored an

amendment to eliminate that provision. Finally, the bill requires former registrants who have let their licenses be cancelled and have remained out of practice for more than 5 years to take national qualifying exams before they can be re-registered.

Sen. Kavanaugh sponsored two bills for the Board this session: SB1256, the Board's "Dereg" bill, and SB1162, relating to the Alarm industry. SB1162 passed out of the Senate but was never assigned to a committee in the House. Although, SB1162 proposed changes to the alarm industry that would have made fingerprinting requirements less burdensome and costly for applicants, those changes will have to wait until next session. SB1256, which proposed the deregulation of the Assayers, the Drug Lab Program, and Remediation Specialists, passed with one minor amendment; now formerly registered Assayers may refer to themselves in professional correspondence as *Emeritus* Assayers.

HB2613, the Governor's initiative to deregulate numerous occupations in Arizona, sponsored by Representative Petersen, was arguably the greatest legislative challenge to two Board regulated professions this session. The bill initially proposed the deregulation of two of the Board's learned

professions: Landscape Architects and Geologists, on the premise that deregulation would stimulate the State's economy. Landscape Architects and Geologists quickly organized to oppose the bill, and with great support from affiliated science and design professions, an impressive number of them appeared at the first committee hearing in the House and testified against it. The Governor agreed to remove the Landscape Architects from the bill after learning that they were registered in every state in the U.S. and in Canada. Rep. Petersen later amended the bill to make registration for Geologists 'voluntary.'

The Board exists to protect the public from those unqualified to practice safely and unscrupulous enough to harm Arizona citizens. Regulation of learned professions has been proven to stimulate the economy by encouraging qualified practice and promoting public protection.

Thank you to all who tried to explain the importance of regulation and public protection to the Governor and the Legislature, and thank you for supporting your colleagues in these related professions.

## BTR Tours Palo Verde

On March 23, 2016, members of Board staff and Surveyor Member, Jason Foote, attended a tour of the Palo Verde Nuclear Generating Station. Palo Verde has been the nation's largest power producer since 1992. It provides clean, nuclear power to 4 million people in Arizona, California, New Mexico and Texas. The site of the Plant comprises over 4,000 acres, approximately 55 miles west of Phoenix. The site was selected in the late 1960s because of its low seismic activity.

Palo Verde is the only nuclear plant in the United States that does not sit on a large body of

water. To cool its reactors, the Plant recycles more than 20 billion gallons of municipal effluent water each year to meet its cooling needs. The treated water is piped 36 miles from surrounding cities to two storage reservoirs with a combined capacity of approximately one billion gallons. These reservoirs provide about 14 days storage of water for the three reactors to operate at full capacity during peak conditions in the hot, summertime weather.

Palo Verde is managed by Arizona Public Service (APS,) which owns the largest share among the seven

utilities that own the Plant. Other owners include Salt River Project (SRP,) Southern California Edison, El Paso Electric, Public Service Company of New Mexico, Southern California Public Power, and Los Angeles Department of Water and Power.

Palo Verde is very safety conscious and vigorously promotes and values the need for registered engineers, in all categories, to maintain the Plant's safe operations and to plan for all its future contingencies.

## Board Member Neal Jones Wins Top Architect Honor

Neal Jones, AIA, of Jones Studio, who serves as an architect member of the Board, was awarded the American Institute of Architects 2016 Institute Honor Award for Architecture, for his project, the Mariposa Land Port of Entry Expansion and Modernization. The AIA noted that Jones' project was "both a source of inspiration and a timely

reminder that quality is not a luxury, but proof of the durability of a society's values and a sure sign of its health." Congratulations to Neal and the Jones Studio for this honor.

## Board Member Alums

Two of the Board's Members, Stephen Noel, P.G., and P. Douglas Folk, J.D., attended the same undergraduate university, Franklin & Marshall College in Lancaster, PA. Noel graduated in 1975 with a

degree in History (he later earned a Master's degree in Geology from Purdue), and Folk graduated in 1977 with a degree in Government.

Folk had heard about Noel while in college, despite their grade difference, because he took an introductory geology class, which he explained was "lovingly referred to by members of their football team as "Rocks for Jocks." Folk also volunteered that he "crashed" a few parties at Noel's fraternity and may have been mistaken for Noel there. Folk regretted not taking more geology classes because the college had a "really cool fieldwork program at Red Lodge in Montana every year."

## Staff Spotlight: Michelle Fleming

Michelle Fleming is a native of the Valley and has truly enjoyed her extensive work history with the State. Michelle has worked as a legal secretary for the Maricopa County Public Defender's office, and as a supervisor with ADOA General Services Division. She also worked for nine years at the Registrar of Contractors in the Legal Department. In 2009, Michelle left State service to work for a construction company, during which

time she also earned a Bachelor of Science Degree in Business Administration. She returned to State service in 2013, working in the Human Resources Unit for DES' Division of Adult Protective Services.

Michelle has been the Board's Licensing Manager since 2015, managing a team of 4 employees and processing the numerous applications for registration and certification received every month. Michelle prepares cases for Board review at monthly meetings, dialogs with

applicants, participates in national council meetings and gives presentations to stakeholders interested in the Board's licensing process.

In her free time, Michelle enjoys relaxing with her family, which includes 3 children, 5 grandchildren and her husband of 25 years.

## Staff Spotlight: Dolly Lucero

Dolly Lucero has been the Board's Assistant Licensing Manager for two years. She is a native Arizonan, born on the Navajo Reservation. She came to the Board with 14 years of service to the State, working previously for the Arizona Corporation Commission Records Division as an Examiner Technician and for the Registrar of Contractors as an Administrative Assistant.

Dolly processes license verification requests and manages the Board's fingerprinting processes. She enjoys working with the Board's staff and serving the public. When she's not at work, she enjoys spending time with her family, playing billiards, and visiting her extended family.

# Surveyors' Apprenticeship

United Surveyors of Arizona, Inc., the “new” surveyor association in Arizona, is sponsoring a Surveyor Assistant apprenticeship program with the Arizona Builders Alliance in order to encourage young, college age students to enter the Surveying profession.

Among other minimum standards, the apprenticeship program will not accept anyone younger than 16. It will promote proper supervision of on-the-job training, and maintain adequate facilities to train the apprentices. The apprenticeships will require a minimum of 2000 hours and related and supplemental instruction in math, algebra, geometry and trigonometry. Safety, note keeping, use and care of basic tools and equipment, maps and plan reading, public relations, survey law, ethics and other subjects will also be taught and required for graduation.

Kent Groh, President of United Surveyors of Arizona, Inc., is excited about the apprenticeship program. “Hopefully, this apprenticeship will provide young people with a stepping stone into the surveying profession,” Groh said. Completion of the apprenticeship might provide an applicant with experience and/or education toward qualification to take the national Fundamentals of Surveying Examination.

## Home Inspector Safety

CHI, and Home Inspector Rules and Standards Committee Member, Randy West, took this photo of himself while he completed a home inspection in Prescott. Randy “banged” his forehead on a metal beam in a crawlspace beneath a manufactured home he was inspecting. He was fine, but he wanted the Board to warn all home inspectors to be “Safe” while inspecting homes and other properties. “Maybe we should all invest in hard hats,” he said.

# Enforcement Advisory Committee Members

Board wishes to extend its sincere appreciation to the following Enforcement Advisory Committee members for their time and expertise in assisting the Board with complaint investigations by providing technical assessments and serving on EAC committee meetings.
