

# Arizona Board of Technical Registration

VOLUME 3, ISSUE 2

NOVEMBER 2015

## Chairman's Communique

It is a real honor to serve as Chairman of the Arizona Board of Technical Registration. I have appreciated the considerable time, effort and excellent leadership by Ed Marley as chair for the last several years. During his Chairmanship the BTR has made significant strides to enhance the services for professional registrants and those applying for Professional Registration in Arizona and to effectively and efficiently deal with disciplinary actions and those activities for the

protection of public health, safety and welfare issues by our Registrants.

While the BTR has a very serious and real responsibly it would not be possible to achieve these requirements without the effective and dedicated efforts led by the Director, Deputy Director and staff providing service to over 40,000 professional registrants in Arizona, new applicants being tested and professionals from other states seeking comity and investigations and disciplinary actions as required.

The regulation of professions throughout the USA is performed in some states and jurisdictions by a single discipline board and in others by a board combining several disciplines. The Arizona Board of Technical Registration is a multidisciplinary

board. After serving on a single discipline board in another state years ago, it is my belief that the obligation for carrying out the responsibilities are significantly more effective and efficient by a multidiscipline board. The Arizona BTR serves professions with large numbers as well as professions with fewer registrants. There is symbiotic effect with our BTR disciplines working together to improve the laws and rules that govern and to provide for administration, testing, investigation, enforcement and comity. This multidisciplinary board strives to be RELEVANT to providing the required Licensure of our professions and to our ultimate purpose "for the protection of the health safety and welfare of the public".

*“I am very proud of the work that the Board has accomplished in the two years I have served as its Executive Director.”*

## Director's Comments

The Board is up for Sunset Review this coming Legislative Session. What that means is that the Legislature will determine whether the Board has met its statutory objectives to protect the public's health, safety, and welfare, and whether it should continue to license qualified professionals and investigate complaints filed against their practice. The Board had to answer questions from its Committee of Reference, made up of members from the House and Senate. The questions included “the extent to which the agency serves the entire state rather than specific interests,” and “the extent to which the agency has been able to investigate and resolve complaints that are within its jurisdiction.” The Board's response is posted on its website, [www.azbtr.gov](http://www.azbtr.gov).

I am very proud of the work that the Board has accomplished in the two years I have served as its Executive Director. The Board's office and staff have been reorganized into three units that better reflect its purpose: licensing, enforcement, and board operations. Necessary and qualified staff was hired and policies and procedures were developed to ensure that the Board was meeting licensing timeframes and investigating complaints in a timely and efficient manner.

In an attempt to license qualified applicants more quickly, the Board worked with Representative Mitchell, who is a certified Home Inspector, to draft a bill last Legislative Session to give the Board the authority to delegate to the Executive Director the ability to grant registrations and

certifications. That bill passed and became effective on July 3, 2015. Now, many complete applications can be granted quickly and efficiently, rather than having to wait for a Board vote at a monthly meeting.

In 2013, the Board employed only two investigators and it had complaints from as far back as 2006 open and pending resolution. After hiring an experienced manager, creating policies and procedures, and staffing the unit with four qualified investigators and one support staff person, the Enforcement unit resolved all of its old cases and is only investigating complaints from 2014 to the present.

The Board has also begun to conduct periodic meetings devoted entirely to strategic planning, in order to maintain its relevance and improve its efficiency. At these strategic planning meetings, the Board reviews operational issues and sets short-term goals, such as purchasing a new computer system to allow applicants to apply for registration and certification on-line, and pay for applications and renewals with credit cards. The Board has also set long-term goals, such as revising its statutes and rules, redefining its scope and refocusing its resources on its core registrant base: the science and design professionals.

To that end, this coming legislative session, the Board

hopes to move the Drug Lab Remediation Program to ADEQ, where, arguably, it should have been all along. The Board hopes to shift the regulation of the Alarm industry to a regulatory entity that has the resources, capability and expertise to proactively serve the public in this field. The Board also proposes to de-regulate certain licenses, such as the Assayers and the Remediation Specialists.

The Board has also become more engaged with its stakeholders, the professional associations and the universities in Arizona, as well as the national councils that administer the professional exams required for registration. The Board members and I serve on several national council committees, working on professional examination development, and the creation of training manuals and ethical practice guidelines.

If you would like to become involved in the work of the Board, your participation on an Enforcement Advisory Committee or on an Application Review Committee would be welcomed. Please contact me, the Board's Enforcement Manager, Doug Parlin, or its Licensing Manager, Michelle Fleming, if you are interested.

The date and time for the Board's sunset hearing will be posted on the Arizona Legislative Service or on the Board's website when they become available. Please feel free to attend.

# The Board Welcomes Jason Foose

The Board is pleased to welcome our new member, Jason Foose. Jason is a land surveyor with over twenty years of experience in the field. Jason is originally from Ohio, but he moved out of state to explore new land surveying opportunities in the west.

Initially licensed in Colorado, he has been licensed in Arizona since 2005 and currently serves as the County Surveyor for Mohave County. As a land surveyor, he takes on a wide array of duties from reviewing minor subdivisions to processing roadway abandonments.

Jason also enjoys writing technical articles and is a regular contributor to American Surveyor Magazine.

In his free time, he enjoys marksmanship and music. He has a passion for playing guitar, especially in the style of norteros and corridos. He plays local events with friends who share his passion. Jason's love of music also inspired him to learn Spanish and sparked an enthusiasm for travelling to Mexico.

Jason is honored to serve the public in his profession. He considers the opportunity to sit on

the Board to be his greatest professional accomplishment to date. The ability to interact with other professionals who share the common objective of ensuring the welfare of the public is the aspect of Board membership Jason takes the most pride in.

*“Jason is honored to serve the public”*

## Message from AZDOR

Evading state taxes is not only a serious crime; it hurts everyone in Arizona. Taxes are used to fund government programs such as education and public safety. When people evade taxes, these programs do not get the support that they need.

The Department of Revenue is offering a tax recovery program that provides a limited-time opportunity for tax payers to come into

compliance.

The goal of the tax recovery program is to offer relief to those taxpayers who, for whatever reason, underreported or failed to file returns and pay their taxes. Tax recovery applications must be received by the Department between September 1 and November 2, with all tax liability paid with the application. Taxpayers who meet all the requirements will

pay no interest and have no civil penalties imposed.

Now is your chance to avoid harsh penalties, criminal sanctions and higher interest. Visit <https://www.azdor.gov> to download forms and read the latest on the program. You may also call the Arizona Department of Revenue at 1-844-698-9176 to obtain further details.

## QUICK TIPS

- Remember that most reputable alarm companies will not send agents door-to-door trying to earn your business.
- Ask to see the individual's certification card issued by the Board and make sure it is current.
- Thoroughly read any paperwork before signing.
- If the individual is claiming to work for a company that has taken over your account, call your alarm company to verify the individual is telling the truth.

## Beware of Alarm Industry Scams

Now that it is cooling down in the Valley, alarm industry scams may

become more prevalent.

Earlier last year, unlicensed agents were targeting homes that already have alarm systems and telling home owners that they were “authorized dealers” coming to offer free upgrades, or that the home owner’s account has been taken over by a new company and the agent needed to install new equipment. In both cases, the goal

was to have the home owner sign a contract leaving them on the hook for the new service, as well as their previous service.

Unfortunately, the Board has had difficulty trying to track down these unlicensed agents. Please read our quick tips to find out the best way to avoid falling victim to one of these scams.

## The Board Says Farewell to Stuart Lane

When it comes to the profession of land surveying, you would be hard-pressed to find someone who has served the State of Arizona more diligently than Stuart Lane.

A former Army Ranger, Mr. Lane made the decision to pursue a career as a Professional Land Surveyor. He originally registered in 1975 and has spent the last 40 years ensuring the public is properly protected.

In the time he has spent a Board member, and the years spent as an Enforcement Advisory Committee and Legislation and Rule Committee member, he has arguably done more for his profession than anyone else in recent memory. He took on the task of writing all the Board’s substantive policy statements pertaining to land surveying, been a champion for his fellow surveyors, and over

his nine years as a Board member (including the last six years) he has earned the respect of other members that have served with him, as well as those that work as staff for the Board. “Stuart’s service to the Board has been invaluable,” said Melissa Cornelius, the Board’s Executive Director, “He will be missed and we wish him well.”

## Staff Spotlight: Doug Parlin

Doug Parlin,  
Enforcement Manager

Born and raised in the State of Maine, Doug began his career in public service after graduating from the University of Maine. In 1982, Doug enlisted in the Maine State Police where he served in various capacities for 22 years. Prior to his retirement as a Detective Sergeant, Doug enjoyed a rewarding career in law enforcement, specializing in polygraph, crisis negotiation and criminal investigation.

After retirement, warmer weather brought Doug and his wife to Arizona. Still with a

desire to continue his career in public safety, Doug joined the Arizona Attorney General's Office as an Investigator, and later transferred to the Arizona Board of Nursing as a Senior Investigator. When the opportunity to serve the Board presented itself, Doug joined the BTR enforcement team. Now the Enforcement Manager, Doug prides himself in providing professional quality investigative services and promoting public protection. Doug enjoys the daily interaction with the public and the Board's registrants, addressing questions and concerns,

and providing information that that helps the public gain a better understanding of the Board's regulatory role and investigative process.

Doug can be described as a sports enthusiast, still with a passion for New England sports teams; he has become an avid Arizona Coyotes fan and closely follows the Arizona sports scene. Stemming from his roots in Maine, Doug enjoys the outdoors and can be found on his off time at his family cabin in the Prescott area.

## Staff Spotlight: Doug Kraemer

Doug Kraemer,  
Assistant  
Enforcement  
Manager

Doug Kraemer was born into a small farming community in Northeastern Ohio. After attending the University of Akron, he joined the Ohio State Highway Patrol and worked the highways as a Trooper. Three years later he moved his wife and son to Arizona and joined the Phoenix Police Department. His

family grew with the addition of another son and a daughter. After 25 years with the Police Department, he retired and spent nearly 10 years in traffic engineering with the Cities of Phoenix and Prescott.

Doug joined the Board in February of 2013 as an investigator. Today, he serves as the Assistant Enforcement Manager and Compliance Manager. He says his law enforcement background fits well with

the work he does for the Board. While enforcing the statutes and rules of the Board is a big part of the job; he says his main goal is to help the Registrants.

In his off time, Doug enjoys riding his Harley around the state. He and his wife of 41 years enjoy traveling and say their favorite place is Hawaii. They divide the rest of their spare time with their seven grandsons.

# Home Inspector Report Checklist

By Randy West, CHI

All Certified Home Inspectors know their inspection reports must comply with the Standards of Professional Practice for Arizona Home Inspectors ('Standards'). All inspectors should also be aware of the Report Checklist Supplement ('Checklist'). The Checklist is a guide to help you ensure your reports fully comply with the Standards. This is available on the BTR website [here](#).

The BTR does not 'audit' Registrants, for example require you to submit a report annually for review. But if a complaint is filed against you, a CHI that is a member of the Enforcement Advisory Committee will use the Checklist to make sure your report is in compliance with the Standards. If your report is not in compliance you could face disciplinary action, even if the original complaint was not substantiated.

The Checklist is updated once a year, near the end of the year. There is a revision date on the bottom of the front page, so you can be sure you are using the latest version. It is advisable to print the Checklist and review your report. There are 84 items

on the checklist, and a line at the beginning of each to write down the page or section number where the information is found in your report.

It is important to do this yearly, e.g. near the end or beginning of the year, to make sure you are using the current Checklist. But it is especially important to do this if you change report software or formats. It is very easy to overlook some items you are required to report on.

I was asked the most common report deficiencies I have found in reports. I frequently find the following information missing: heat and cooling source in every livable room, automatic safety controls for the heating system and water heater, functional flow and drainage, and circuit breaker

compatibility. Some of these are just informative, and you may consider them minor, but this information must be in the report.

The Checklist is a great guide for reviewing your report. It explains the difference between 'observe' and 'describe'. The Checklist has additional information on some items. For example under 'Compatibility' the Checklist states: "Compatibility- Observe and report on condition (e.g., report when breakers or fuses are oversized). It is not acceptable to report the panels as simply satisfactory to address compatibility." For 'heat source' the Checklist states "...must contain a reference to heating source presence in each room...". Just reporting the "ducts and registers are serviceable" does not satisfy reporting on a heat source in every room.
